# Trust Performance Scorecard

## Monthly report to the end of September 2015

### 1. Introduction

The Performance Scorecard (attached) provides an overview of Trust performance against a set of key standards and targets under the Trust key strategic objectives of:

- Safety and Excellence
- Continuous Improvement
- Partnerships
- People
- Resources

Section A:

A summary of performance against a range of standards and targets, the majority of which are set out in the Health and Social Care (Commissioning Plan) Direction 2015.

Section B:

Where targets are not being delivered or are at risk of delivery, more detail is provided to indicate trends analysis and actions to improve performance.

### 2. Summary – End of September 2015

Of the 38 DHSSPS standards and targets noted, the Trust is delivering, is slightly behind, or is expected to achieve the required level of performance in 20 areas.

The following standards and targets are not currently being delivered and are significantly behind target (more than 10%), or are at risk of delivery:

- HCAI (MRSA,C Diff);
- Cancer Services (urgent breast cancer 14 days; and 62 days treatment);
- Unscheduled Care – A&E (RVH, MIH sites), 4 hour / 12 hour;
- Outpatients – Waiting Times (60% < 9 weeks, 18 weeks max waiting time);
- Diagnostic – Waiting Times (< 9 weeks, 2 days for urgent diagnostics);
- Inpatient and Daycase - Waiting Times (65% < 13 weeks, 26 weeks max waiting time);
- AHP Waiting Times < 13 weeks;
- Learning Disability Discharge (percentage discharged within 7 days);
- Acute Hospital Complex Discharges (<48 hours and > 7 days);
- Mental Health Outpatient – Waiting Times (Psychological Therapies); and
- Hospital Cancelled Outpatient Appointment.

8.1 / 8.4	<b>Bernie Owens/ Brian Barry/ Jennifer Welsh/ Catherine McNicholl</b>	From April 2015, at least 60% of patients wait no longer than nine weeks for their first outpatient appointment and no patient waits longer than 18 weeks.		<p>The Trust continues to be unable meet the new Commissioning Directions targets in a range of specialties due to lack of capacity. At present funding is not available for additional activity and waiting times are increasing in a number of specialties. A number of specialties continue to have waiting lists in excess of 52 weeks. These include: Gastroenterology, General Surgery, Orthopaedics, Immunology, Neurology, Ophthalmology, Rheumatology, Thoracic Medicine, Urology, Vascular Surgery, and Immunology. The HSCB has commenced a regional process to review OP referral pathways in four specialties (General Surgery, Gynaecology, ENT, and Rheumatology). The Trust is contributing to the work and has been asked to take the lead in relation to ENT. Regional Workshops are being arranged during November.</p> <p>The Trust OP Modernisation project is ongoing. Clinical leads have now been appointed to take a lead role in this work which is focusing on streamlining patient pathways, review of workforce, administration and infrastructure, and maximise use of technology.</p>

- The Trust continues to experience challenges in data collation and report production for some AHP specialties. The Trust has advised the HSCB regarding the current limitations in producing data. Work is underway with Trust Information Systems to address these challenges during 2015/16 through the rollout of PCIS.
- The Ministerial target changed on the 1<sup>st</sup> April 2015 to state that no patient should be waiting over 13 weeks to access AHP services. The waiting time in BHSCCT remains above the Ministerial target in some sub-speciality areas of the AHP services.
- The majority of breaches have arisen largely as a result of capacity issues; however some areas of the services are also experiencing a sustained increase in demand.
- The Trust is participating in ongoing discussions with the HSCB to review service demand and capacity issues. The Trust also continues to take forward recruitment for a number of posts, with a view to improving the numbers of patients waiting longer than the target.

These have been discussed at elective reform meetings with 3 specialties – Gynaecology, Ophthalmology and General Surgery. The Trust OP Modernisation Groups will be focusing on identifying actions to support a reduction in hospital cancellations for 15/16. Some data quality issues regarding hospital cancellations are under discussion both internally and between the Trust Information Department and the HSCB.</p>

## Appendix (i)

### Acute Hospital Service and Budget Agreement Activity to the end of September 2015

For the period 2015/16, core activity had been agreed in the majority of specialties with the HSCB for monitoring purposes. The HSCB have subsequently applied a 2% uplift or 2012/13 outturn (if higher) in a number of specialties associated with productivity. The Trust has advised the HSCB these uplifts are not agreed, as cash efficiency requirements in these areas do not allow for productivity as well.

The graphs below indicate Trust performance in relation to elective IPDC and OP for a range of specialties against Trust core activity levels. Data which indicates Trust activity for non-elective activity for the same period is also provided. This is because a significant increase in non-elective activity over a period can impact on hospital elective activity capacity (for monitoring purposes for non-elective activity, comparison against 2011/12 non-elective activity has been provided).

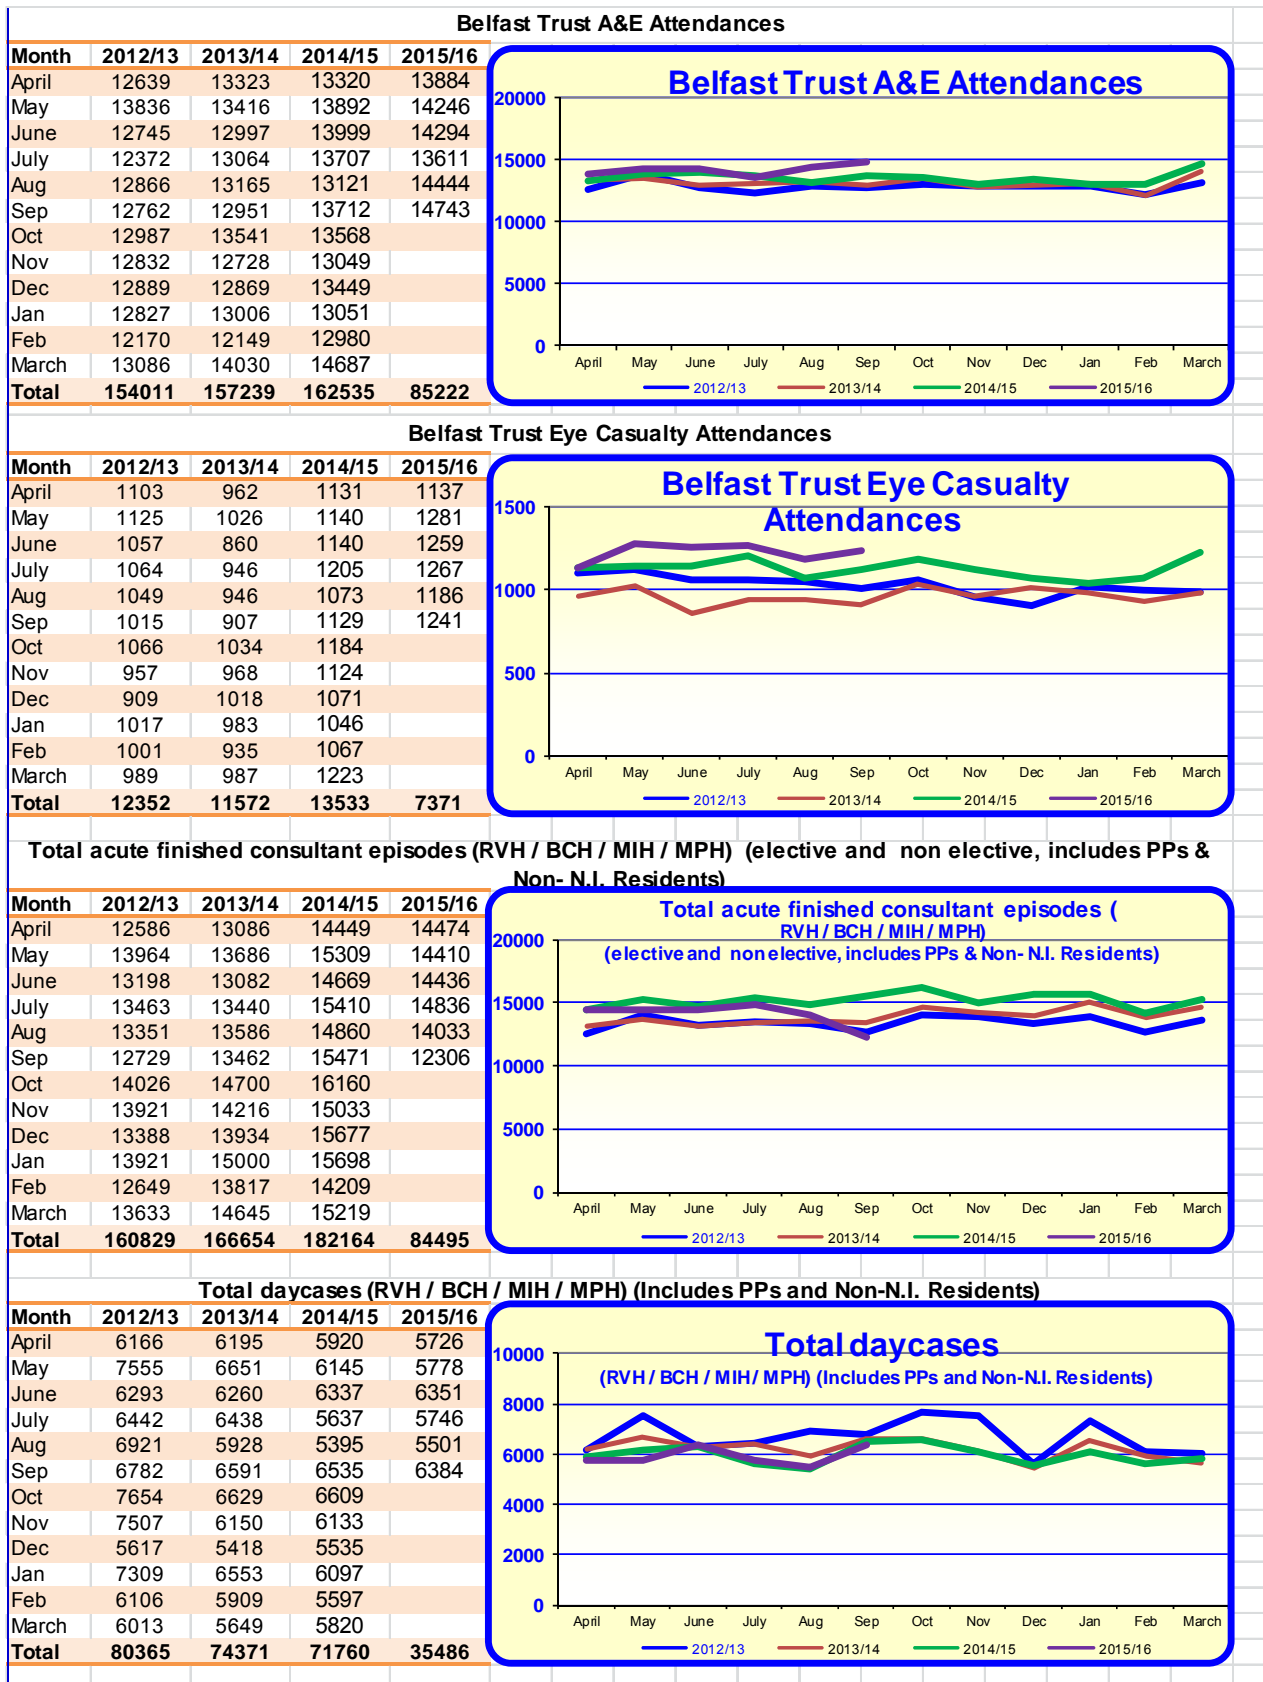

The graphs indicate the following performance;

- Elective IPDC +2%
- Non-elective admissions +12% (compared to 2011/12)
- OPN -6%
- OPR +6%.

**Acute AHP activity** is included during 2012/13, prior to this only community activity was counted.

**Community Nursing Activity:** It was agreed to include activity from a number of community nursing services in Trust Board reports to accurately reflect District Nursing Activity (e.g. Activity of 7 specialist nursing teams previously not recorded) as a result there appears to be a significant increase in activity for 2013/14.

**1. To be reported Annually**

**Family Nurse Partnership**

- By March 2015, improve long-term outcomes for the children of teenage mothers by establishing a test site of the Family Nurse Partnership Programme within each Trust.

**Children in Care**

- From April 2015, ensure that the number of children in care for 12 months or longer with no placement change is at least 85%.
- By March 2016, ensure a three year time frame for 90% of children who are adopted from care

**Normative Staffing**

- By March 2016, implement the normative nursing range for all specialist and acute medicine and surgical inpatient units.

**2. Targets to be reported once clarified by HSCB**

**Excess Bed days**

- By March 2016, reduce the number of excess bed days for the acute programme of care by 10%.

**Unplanned weekend admissions death rate**

- From April 2015, ensure that the death rate of unplanned weekend admissions does not exceed the death rate of unplanned weekday admissions by more than 0.1 percentage points.

**Unplanned admissions - Acute Conditions**

- During 2015/16, ensure that unplanned admissions to hospital for acute conditions which definitely should normally be managed in the primary or community setting, do not exceed 2013/14 levels.
