

Equality, Good Relations and Human Rights SCREENING TEMPLATE

****Completed and Signed Screening Templates are public documents posted on the Trust's website****

- All policies / proposals require an equality screening
- Policy / Proposal authors / decision makers are responsible for Equality Screenings

Section 1: Information about the Policy / Proposal							
(1.1) Name of the policy/proposal	Policy for the intravenous (IV) administration of gadolinium based contrast media to adult patients by imaging MRI staff						
(1.2) Status of policy/proposal <i>(please underline)</i>	<div> <div>New</div> <div>Existing</div> <div>Revised</div> </div>						
(1.3) Department/Service Group: <i>(please underline)</i>	Corporate Services Group <i>(Please specify)</i>	Nursing and User Experience	<u>Un- scheduled and Acute Care</u>	Surgery & Specialist Services	Specialist Hospitals & Women's Health	Children's Community Services	Adult Social & Primary Care
(1.4) Description of the policy/ proposal? State the aims and objectives/key elements of the policy/proposal. Detail the changes the policy/proposal will introduce. How will the policy/proposal be communicated to staff /service users? Describe how the policy/proposal will be rolled out/put into practice e.g. will there be changes in working patterns / changes to how services will be delivered etc.	<p>Background:</p> <p>This policy is to provide information for MRI staff on the IV administration of gadolinium based contrast media.</p> <p>The use of Gadolinium based contrast agents (GBCAs) has become fundamental to MRI and the compounds used in daily practice are safe. GBCAs have the potential to cause Nephrogenic Systemic Fibrosis (NSF) which is a rare but potentially fatal condition and it has been found in patients with severely impaired kidney function. Recently, gadolinium retention has been reported. As a result, the marketing authorisations of some GBCAs have been withdrawn from use.</p> <p>Scope:</p> <p>This policy applies to:</p> <ul style="list-style-type: none"> • All imaging staff (Radiologists/ Cardiologists and Radiographers) who administer intravenous (IV) gadolinium based contrast media to adult patients at BHSC 						

- Administration should only be carried out by an appropriately entitled/trained Radiologist/Cardiologist or by a Radiographer for those examinations previously agreed by Radiologists/Cardiologist.
- At present, those imaging examinations for which Radiologists/ Cardiologists have approved the administration of IV contrast media are listed in each department's clinical protocols. Named Radiographers are entitled to administer/supply contrast media without prescription in accordance with Patient Group Directions (PGD).
- An appropriately trained clinician must be present in the department during the administration to assist with any complications. During core working hours, this will normally be a Radiologist. Local agreements may be in place for alternative medical cover if a Radiologist is not present especially during out of hours scanning.
- This should include out of hours procedures where no Radiologist is on site. The referrer will provide medical assistance for the contrast administration out of hours. For out of hours procedures the reporting Radiologist will advise which protocol is required.
- The BHSCT have contractual employed independent sector Radiologists (e.g. Medica) who will justify the exposure and advise on the imaging protocol required. If these Radiologists will not prescribe contrast and if the patient is excluded under PGD then the Radiographer must refer to an on-call BHSCT radiologist.
- A decision to administer gadolinium based contrast agent must be recorded on the referral or in the request notes on Radiology Information System (RIS).
- Radiographers who are entitled to undertake IV cannulation and medicines administration under this policy may inject the following contrast agents in accordance with department protocols:
 - Gadolinium based contrast agents

	<p>Aims:</p> <p>This policy aims to provide information for MRI staff on the potential and theoretical risks of IV administration of GBCAs which must be weighed against the potential benefits to the patient.</p> <p>Dissemination:</p> <p>Dissemination to Radiographers and Radiologists/Cardiologists within imaging services via Imaging team meetings, and staff induction. Publication of this document will also be included in the fortnightly imaging services newsletter. An electronic copy will be made available imaging staff to access via the imaging services Sharepoint document library.</p>
<p>(1.5) Who owns the policy/proposal? Where does it originate? For example: DoH / HSCB</p>	<p>Director, Unscheduled & Acute Care Directorate, BHSCT.</p>
<p>(1.6) Who are the main stakeholders affected (Internal and External)? For example: actual or potential service users, carers, staff, other public sector organisations, trade unions, professional bodies, independent, voluntary or community sector or others.</p>	<p>Adult service users, MRI Radiologists, MRI Radiographers, MRI Cardiologists.</p>
<p>(1.7) Provide details of how you involved stakeholders, views of colleagues, service users, staff side or other stakeholders when screening this policy/proposal.</p>	<p>This policy has been developed by the MRI Lead Radiologist BCH, site lead Radiographer BCH/MIH, MRI lead Radiographer BCH and QSI Radiographer. Imaging services Clinical Director, Site lead Radiologists, Imaging services manager, site lead Radiographers and Cardiology were consulted via email and online meetings.</p>
<p>(1.8) Other policies/strategies with a bearing on this policy/proposal For example: internal or regional policies</p>	<p>BHSCT Hospital Medicines Code BHSCT Injectable medicines Code Consent policy Infection control policy</p>

Section 3: Consideration of Equality and Good Relations Issues and Evidence Used

This section records the quantitative and qualitative data you have used to consider equality and good relations issues including:

- The assessment of impact on staff and service users

- The identification of mitigation factors to reduce/remove any adverse impact
- Opportunities to better promote equality of opportunity

Evidence to help inform the screening process may be quantitative and qualitative. For example: previous consultations and equality impact assessments (eqias), statistics, research, complaints, feedback, referrals, grievances, inspection reports, focus groups, user groups etc.

(3.3) Quantitative and Qualitative Data: Staff

This information will be provided together with analysis and advice by the Employment Equality Team in the Human Resources department.

Quantitative Data: For staff data please contact Martin McGrath on 028 95 048353 / martin.mcgrath@belfasttrust.hscni.net

Qualitative Data: Consideration will be given to the different needs, experiences and priorities of each of the categories in relation to the policy / proposal.

Should any equality / modernisation related issues arise they will be managed through the Organisational Change Framework. [Click here for Framework](#)

When organisational / policy change is necessary, regardless of whether it is a permanent or temporary change, the Trust is committed to treating staff fairly and equitably. Staff can be assured that the change process will be managed. This includes consultation with staff and the opportunity for staff to discuss in one to one meetings, any adverse equality impacts resulting in changes to their employment.

This framework also works alongside other Human Resources policies including for example the Disability and Reasonable Adjustment Framework, the Work Life Balance Policy and Procedure, the Recruitment and Selection Policy and Procedure and Agenda for Change Terms and Conditions Handbook.
