Incidence of Thrombosis within Belfast Trust since December 2019 to as close to the present day as possible

Question:

I am looking for data that your Trust has on the incidence of thrombosis within your trust since December 2019 to as close to the present day as possible. So this would include data of thrombosis incidence for every month since December 2019 to as close to the present day as possible. The date of writing this email is 14/06/21.

Answer:

There are many types of clots and the figures included in the attached excel spreadsheet relate to clots causing Stroke, Heart Attack and Deep Venous Thrombosis.
