

30 November 2021

Covid-19 - Vaccination Status of ICU Patients at 15 November 2021

As of the fifteenth of November 2021, how many patients in ICU are vaccinated and how many are unvaccinated?

Please see below response, which relates to patients in Adult ICU who are COVID-19 positive.

2 x Vaccinations	1 x Vaccination	0 x Vaccination	Unknown	Total
5	1	4	0	10

What method does the Trust use to find out if patients who are admitted to the hospital are vaccinated?

Nursing staff request information on vaccination status from patients/families; however, we are unable to confirm the accuracy of this information.

The vaccination status of individual patients is not documented consistently in patient records and is not recorded on a central system in Belfast Trust. The vaccination status of individuals is recorded onto the Regional Vaccine Management System to which Belfast Trust do not have full access.
