

13 December 2021

Covid-19 – Number of Patients in Royal Hospital ICU on 1 December 2021 and Breakdown of their Vaccination Status – Updated Response

Following Belfast Trusts response dated 9 December 2021 - I'd also be interested in seeing the overall vaccination status of patients in the ICU on 1st December

As advised, there were 32 patients in ICU on 1 December 2021 – of those:

There were 9 patients who tested positive:

2 x vaccine:	4
1 x vaccine:	1
Unvaccinated:	4

There were 23 patients who tested negative:

2 x vaccine	10
1 x vaccine:	1
Unvaccinated:	6
Unknown:	6

Nursing staff request information on vaccination status from patients/families; however, we are unable to confirm the accuracy of this information.

The vaccination status of individual patients is not documented consistently in patient records and is not recorded on a central system in Belfast Trust. The vaccination status of individuals is recorded onto the Regional Vaccine Management System to which Belfast Trust do not have full access.
