

23 December 2021

## **Covid-19 – Deaths from Covid-19 alone and not anything else from 1 February 2020 to 31 October 2021.**

**How many people have died in the Belfast Health and Social Care Trust hospitals and facilities from Covid-19 alone? I am aware of the number of people that have died within 28 days of a positive Covid test, so they could have died from other causes. I would like to know the exact death figure, broken down by age categories, from 1<sup>st</sup> February 2020 until the 31<sup>st</sup> October 2021 of people that have died due to Covid-19 alone and not anything else please.**

From 1 March 2020 until 9 December 2021 inclusive, 24 patients died within Belfast Trust hospitals and facilities of COVID-19 alone. This figure has been broken down by age band and number of patient deaths in the table below:

| <b>Age Band</b> | <b>Patients Died</b> |
|-----------------|----------------------|
| 50 - 59         | 1                    |
| 60 - 69         | 3                    |
| 70 - 79         | 1                    |
| 80 - 89         | 13                   |
| 90 - 99         | 6                    |
