

# Staff Briefing

## STOP THE SPREAD. TAKE THE TEST.

It's quick and easy.  
It doesn't hurt.  
It will protect others.

Belfast Trust is rolling out rapid COVID-19 testing for all staff.

### LAMP TESTING

## World Quality Day

World Quality Day takes place on Thursday 11 November and the webinar to mark the day will run from 9.15am to 12.30pm.

Dr Niall Herity, Consultant Cardiologist, will be presenting at the webinar his talk 'Breaking Down Barriers'.

*Traditional care for people with long-term conditions is typically disjointed with almost no real-time cooperation between primary and secondary care, nor between secondary care specialties. Care is also primarily focused on individuals, without taking advantage of big data to manage care at a population-level.*

*To address these problems, we have developed and piloted a completely new, four-step approach to long-term conditions care, which we will describe. We have also demonstrated that GPIIP (which amalgamates coded health data from every GP practice in Northern Ireland) is able to return accurate clinical information that could underpin such a model of care at population-level.*

*The work has enhanced communication between primary care, cardiology, nephrology and endocrinology teams. Although initially focused on diabetes, this evolving model of care could apply to any long-term health condition.*

**Safety & quality**
