ADHD Waiting List

I would like to receive information, with regards to the current ADHD waiting list:

How many children are being assessed each day?

The information system is unable to provide daily figures, but the monthly data available outlines that an average of 24 assessments are undertaken per month. Each assessment takes a number of hours.

How is it being managed? By what factors?

The service is managed by clinical priority

How many are currently on the list?

Currently there 1182 children on the waiting list with an estimated longest waiting time of 5 years.

How do you decide which child is seen as a priority?

Children who are facing school exclusion and those in Primary 7 are seen as priority.
