

Patient Information for Plain X-Ray

What is an x-ray?

X-ray is a widely used diagnostic test to examine the inside of the body by creating an image much like a photograph. If your doctor or healthcare professional decides you might benefit from an x-ray Radiographers, who are highly trained professionals, will perform it and the images will be reported by a Radiologist or specialist healthcare professional.

What are the benefits and risks?

An x-ray can give information that leads to or helps make a diagnosis about your medical condition, or monitors an existing condition.

X-rays use ionising radiation. The dose you get from an x-ray is very low and the associated risks are minimal with no side effects or changes to your normal activity. The benefits of having your x-ray will outweigh any risk. A Radiographer will check that each x-ray request is necessary and are responsible for making sure that the radiation dose you receive is kept as low as necessary.

Pregnancy

Radiation may be harmful for an unborn baby. If you are, or think you may be pregnant you **MUST** tell the Radiographer before the x-ray. For some examinations individuals between the ages of 10 - 55 will be asked if there is any possibility of pregnancy before the x-ray is performed.

When you arrive in the x-ray Department

On arrival you will be booked in and directed to the waiting area. Where possible you should attend appointments alone to minimise infection risks. However, if you require assistance you can bring someone along with you, and patients under 18 should be accompanied by a responsible adult / guardian.

Prior to your x-ray

You may be asked to change into a gown as certain types of clothing can affect the quality of the x-ray. You may also need to remove jewellery, glasses etc depending on which part of you we are x-raying.

Consent

The Radiographer will ask you if you are happy for the examination to go ahead. This is called verbal consent. If you do not wish to have the X-Ray scan or are undecided, please tell the Radiographer. If you wish to have a chaperone present during your scan, please alert a health care professional before the scan begins.

Students/trainees may be present during the examination but only with your verbal consent.

Please remember that you can ask the Radiographer any questions you have at any time before, during or after your scan.

What happens during and after your x-ray?

The Radiographer will give you instructions and position you for the different images they need to take. It is important to remain still in these positions until the x-ray has been taken. The x-ray should not be uncomfortable and should only take a few minutes. The Radiographer will stand behind a screen when taking the X-rays but can see and hear you at all times. Once your x-ray is complete you may get dressed and will be informed if you should go home or return to your referring clinic.

When will I get my results?

Your GP will have the results of your x-ray in 14 to 28 days. If you were referred by a Trust doctor they will contact you regarding your results.

Image sharing

Your images will be electronically stored on the hospital picture archiving system. This data can be accessed throughout the Belfast Health and Social Care Trust and other doctors and health care professionals who are directly involved in your care. The ability to share images and radiological reports will improve the safety and quality of your care by ensuring that the right information is available in the right place at the right time.

In order to improve the medical services we provide we may also use your data as anonymously as possible for internal audit and medical education. If you would prefer that your data is not used for these purposes, please inform a member of staff when you attend for your examination.

If your data is to be used for research, then a separate consent process will be used. You will be asked for your consent, should this be the case.

Contact & Feedback

If you have any queries we will be happy to answer these on the day or you can contact the number given on your appointment letter.

We hope you found the information in this leaflet helpful. If it did not tell you what you needed to know or you would like to provide any feedback on your experience please let us know so that we can make any necessary improvements.

You can provide feedback on your experience:

Telephone: **028 9504 8000** (Monday-Friday: 9am-4pm)

Textphone: **18001 028 950 48000**
