## Antifungal Treatment

I would be grateful if you would please answer the following questions concerning antifungal treatment within your organisation.

**1) What is the number of patients in the last 12 months treated with the following product lines:**

- a) anidulafungin
- b) caspofungin
- c) micafungin

**2) What is the split of indication over the last 12 months for the following product lines:**

- a) anidulafungin
- b) caspofungin
- c) micafungin

**3) For each of the indication splits of the 3 product lines mentioned previously (anidulafungin, caspofungin and micafungin from Q2) list the average length of treatment time.**

We are unable to provide this information as these medications are not used within Dermatology in Belfast Trust.

Also, within Podiatry we do not supply any of the antifungals listed.

We would only supply under prescription only medications (POMS) a very limited range of topical antifungals to patients with our Inclusion Homeless service.
