## Diagnostic and Procedural Data by Hospital in Belfast Trust – Financial Year 2021 to 2022 (Updated Data)

**Following Belfast Trust's response of 14 October 2022 (Ref: FOI/28098), I just wanted to confirm with you if the totals of diagnosis and operations (based on episodes) are 100% for the FY 2021 to 2022. When we compared to the previous year's totals, they are slightly higher than 2020 but still about 52% and 61 % of the totals for operations and diagnosis in 2019.**

The data provided for 2020/21 and 2021/22 was based on episodes but it looks like the previous years have also included daycases.

The daycases have now been included in the episode totals, in line with the previous years. Information included in two separate Excel documents.
