## **Stroke and Hyponatraemia Discharges**

### **Request**

Would it be possible to provide me with:

1. How many stroke patients were treated last year (January 2021- January 2022).
2. How many patients were suffering from Hyponatremia when Hospitalised (January 2021- January 2022).

For question one I'm looking for how many stroke patients there were generally (January 2021-January 2022)

For question two I'm looking for the general number of patients suffering from hyponatremia when hospitalised (January 2021-January 2022)

For both questions I'm looking for statistics on adults only.

### **Response**
