## **Botox Injection Cost**

**I have been offered an injection of botox into the larynx under general anaesthetic as a day patient by ENT surgeon, (named surgeon), at the Royal Victoria Hospital. My question is how much would such a procedure cost the Trust?**

The average cost of a minor ENT day case injection procedure is £1,144. Additionally, there is an average cost of £80 for the drug.

Therefore the average cost of a surgical procedure to inject botulinum toxin to vocal cords under a general anaesthetic would be £1224.
