Blood Products

I want to submit an FOI request for the amount of consumption of blood products (**Fresh whole blood (FWB), Fresh Frozen Plasma (FFB), Cryoprecipitate, Factor XIII, red blood cells (RBCs), platelets, etc.**) in their respective unit and the number of patients (or orders) in 2022 (the entire calendar year).

- Broken down by the dispensing institution (blood bank, pharmacy, others),
- By service ordering the products (General Surgery, Hepatology, ObGyn, etc.)
- If available, the procedure (elective, non-elective surgery, retail,)

We will need more time to get detail pertaining to the service ordering the product or procedure it is used for.

Report related to	Number of Units Issued (Do not include units received from a hospital blood bank)	Number of Recipients	Number of Units Transfused
Whole Blood	0		
Red Blood Cells	15,325		13,889
Platelets	4,446		4,204
Plasma - FFP	1,816		1,290
Plasma - Cryoprecipitate	525		475

Furthermore, I would like to have information on patient numbers and volumes (in IU or mg) per brand for Q3'22 (the entire time period from October 1st to December 31st 2022) and for the calendar year 2022 for the following brands:

Hemlibra
 Esperoct
 Adynovi
 Elocta
 NovoEight
 Advate
 ReFacto AF
 Nuwiq
 NovoSeven
 FEIBA
