HEPA Filters

How many HEPA filters have been installed by the Belfast Trust in the last three years?

Belfast Trust has bought 105 HEPA filters in the last 3 years. The majority will have been installed and some may be in stores waiting for installation. These type of filters are mainly used in Laminar Flow Theatres, Isolation Rooms and Pharmacy Production Areas.

Are any programmes in place in the Belfast Trust to upgrade mechanical ventilation in hospital wards?

Belfast Trust maintains all installed ventilation systems on a regular basis through routine inspections, risk assessments and airflow verification. There is no specific programme in place to upgrade mechanical ventilation.
