Report on Culture and Openness

Belfast Health and Social Care Trust commissioned a report on culture and openness within the organisation. I had been advised that the Department of Health would be able to provide the report. They have advised that the report was commissioned by Belfast Health and Social Care Trust and not the Department of Health. The report was not issued to DoH, and I should therefore re-direct my request to Belfast Trust. Can this report please be provided in keeping with FOI?

Belfast Health and Social Care Trust did not commission a report on openness and culture in the organisation.

I understand the Department of Health has recently updated and clarified that with you.
