## **Serious Case Review Report re Deceased Individual**

**I would like to submit an FOI re a Named Individual – Patient/Client was reviewed by Social Services in UK and Social Services in Northern Ireland. Then the reviews were brought together for an overall review. I would like a redacted copy of the Serious Case Review. That is, any named third parties redacted.**

**Clarification Provided: This is a complicated matter - I contacted the ICO, who clarified this falls under Freedom of Information request. To be more clear on my request - when this person died a Serious Case Review was carried out. There was carried out in Belfast and one in UK, where the person originally came from. The two areas shared their findings. These Serious Case Reviews are generally anonymized and made available for the public to see. These are done to see what learning can be gained. I would just like to have the Serious Case Review report. That is no information to the background or people involved.**

Belfast Health and Social Care Trust has searched its databases and clinical systems and cannot find any reference to a Serious Case Review that was conducted by the Belfast Trust concerning the individual named.
