Radiology Equipment

Under the Freedom of Information Act, I would like to request details regarding radiology equipment at hospitals managed by the Health and Social Care Trust, could you please provide:

A list of all current radiology equipment (including CT, MRI,PETCT, X-ray, fluoroscopy, ultrasound, mammography, and DXA systems) across hospitals in the HSE

For each item, the following details:

Equipment type and manufacturer/model

Date of installation/commissioning

Date of last replacement (if applicable)

Planned replacement date (if scheduled)

Any records or schedules of department-wide equipment replacement projects carried out over the past 10 years.

I would be grateful if the information could be supplied in electronic format (Excel or Word is preferable).

Please see attached excel spreadsheet.

This is what we can provide within the 18 hours. To provide anything more that this would take considerable amount of time to go back 10 years. This would exceed the costs limit specified in the FOI act.

We have provided what we can in respect of equipment replacement.
