## **Authorising Engineer Reports**

### **Dates of Authorising Engineer Reports carried out on the Trust's Medical Gas Pipeline System (MGPS) from 2010 until 2025**

Following completion of an internal sampling and scoping exercise, a determination has been made that locating, retrieving, and extracting the requested information would exceed the 18 hour FOI threshold and would exceed the cost limits specified in the FOI act.

Furthermore, the requested information, relating to this timeframe, was not centrally held. There are four operational divisions with medical gas installations, spanning across five main hospital sites and other venues. To undertake this exercise would necessitate a manual interrogation of data which would involve a significant number of hours.
