Hospital-level Activity Data

Following on from Belfast Trust's response to FOI/36242

Thank you for the information you've provided so far, however, please accept our sincere apologies for an oversight in our original request. While we understand that some ICD10 codes are only three characters in length, for our purposes we need the data submitted as four characters. Also, we requested 4 characters for the OPCS codes but they have only been supplied as 3 characters.

We'd really appreciate it if you could re-submit the full datasets to this format, and again apologise for the lack of clarity in our original request.

Belfast Health and Social Care Trust's response to the above question is set out in the Excel spreadsheet attached.

Use of <5 (less than five): We are unable to provide an exact figure - exempt from release under Section 40(2) of the Freedom of Information Act - Personal Information relating to a third party, as the small numbers involved could make patients personally identifiable.

Disclosure would constitute a breach of the principles of the General Data Protection Regulation 2018.
