For Q1, we are unable to confirm if the patient had been treated but can provide information on those patients who have attended A&E with a diagnosis or queried diagnosis of Anaphylaxis.

Q1 – data for 2026 has been provided from 1st January 2026 to 31st May 2026.

Q2 – Clinical Coding is required for a hospital admission diagnosis of Anaphylaxis. Due to a lag in clinical coding we can only provide data up to 31st December 2025.

Where numbers are low we have indicated <5 rather than give the exact figure. We feel that providing the exact figure has the potential to make people identifiable and so that information is exempt from release under Section 40(2) of the Freedom of Information Act 2000.
