Children's Safeguarding Team Staff Survey Results

Please provide the following in relation to the most recent Belfast Health and Social Care Trust staff survey:

- 1. The anonymised results for the Children's Safeguarding Team, where these are available.**

Results for the Children's Safeguarding Nursing Team are not available for disclosure due to the minimum reporting threshold not being achieved. In line with the Trust's Data Protection Impact Assessment (DPIA) and anonymity requirements, results are not produced or reported where response numbers fall below this threshold to protect staff confidentiality.

- 2. If team-level results cannot be disclosed due to the risk of identifying individual respondents, please provide the results at the next highest level of aggregation (e.g. department, service, or directorate).**

As the Children's Safeguarding Nursing Team results cannot be reported, the next available reporting level is Child Health (report attached), which comprises the following teams:

- Health Visiting Teams / Family Nurse Partnership Team
- Community Children's Nursing / Complex Needs
- Public Health Teams
- Children's Safeguarding Nursing Team
- School Nursing / Immunisation Team

- 3. Any summary reports, presentations or action plans produced in response to the survey for the relevant team, department or directorate.**

No summary reports, presentations or action plans have been produced at present for Child Health

- 4. The overall response rate for the relevant team, department or directorate.**

The response rate for the Child Health service is detailed within the attached report.
