Covid-19 – Current Protocol/Treatment/Medication for Outpatients and Hospital Inpatients

I wish to enquire what is the current protocol/treatment/medication for individuals with Covid-19 - both as outpatients and hospital inpatients.

Belfast Trust receives guidance from the Department of Health on all aspects of current management, treatment and medication for Covid-19 patients.

This guidance is updated on a regular basis and is shared regionally by the Department of Health to Health and Social Care Trusts.

Belfast Trust would therefore like to redirect your query to the Department of Health for any information you may require or alternatively you can follow the website link www.health-ni.gov.uk/coronavirus.
