## **Covid-19 – Vaccination Status of Patients, Deaths and Availability of Ventilators**

**Since the beginning of the public vaccination programme for Covid-19, in each hospital in your Trust**

**a) How many vaccinated patients with i) one and ii) two doses of an approved vaccine have been admitted to hospital with Covid-19**

Belfast Trust are unable to respond, as we do not hold this level of detail regarding individual patients' vaccination status. The vaccination status of individual patients is not documented consistently in patient records and is not recorded on a central system in the Trust. The vaccination status of individuals is recorded onto the Regional Vaccine Management System, to which Belfast Trust do not have full access. The Department of Health may be able to assist.

**b) How many of those patients have died from covid-19 by month**

As above, Belfast Trust are unable to respond, as we do not hold this level of detail regarding individual patients' vaccination status - we are unable to link vaccination status to deaths.

**How many ventilators have been available to your hospitals since the beginning of the pandemic by month and if your hospital has made any requests for further ventilators and if those requests have been approved or denied**

The Trust have a total of 259 ventilators available.

The following number of ventilators have been procured each month (where no data is given, then no ventilators have been procured for these months)

March 2020	9
April 2020	23
June 2020	30
August 2020	8
September 2020	43
October 2020	34

There were no requests to procure further ventilator stock.
