## Death of Neurology patients under care of Dr Michael Watt

### Enquiry:

I should like to ask under FOI rules how many of the patients of the former BHSCCT neurologist Michael Watt died between his appointment as a consultant in June 1996 and March 2008.

### Response:

The information requested is not collated centrally by Belfast Trust and we do not have the available IT infrastructure able to extract the information required.

Information may be available from the Planning Team at the Strategic Planning and Performance Group (SPPG) – formerly the HSC Board and now part of the Department of Health. They may have the mechanisms to extract this information from their IT systems.
