## **Which hospitals were staff with MH conditions sent to if they needed inpatient treatment?**

**For staff of BHSCT, could I ascertain where staff with mental health conditions would be sent if they required inpatient treatment?**

Staff from BHSCT requiring inpatient Mental Health services would be admitted to the hospital that aligns with their home address / catchment area. This is similar process to any person requiring inpatient mental health services.

Where there may be sensitivity around this i.e.; where the staff member lives and works in BHSCT catchment area, an admission in another Trust may be negotiated at the request of the patient.

**That is, which hospitals where they sent to over the past 2 years?**

Mental health inpatient services, do not collect data regarding the patient's place of employment, therefore we are unable to answer.
