

**20 February 2024**

## **Mesothelioma diagnoses 2022 and 2023**

**Could I please have confirmation of the number of patients who have been diagnosed with mesothelioma in the years 2022 and 2023. If possible can the information be divided into pleural and peritoneal cases.**

There were 7 patients diagnosed with Mesothelioma in 2022 and 8 in 2023. The data that we have is not separated in to pleural or peritoneal.

Please note that this information is dependent on coding so may not be fully accurate.
