

7 September 2021

For August 2016 to August 2021 - Information on Haemodialysis Patient Deaths, Figures for Renal Transplant Patients Living/Deceased and Number of Kidneys Unsuitable for Use

I would like to obtain information on the number of haemodialysis patients that have died over the past 5 years and the location of death. In addition I would like to know the length of time between haemodialysis patients stopping haemodialysis and death occurring.

Belfast Chronic HD Patients, DoD August 2016 onwards

Source: eMed, ran on the 17/08/2021

Days Between Death & Last HD Session	Location of Death			Grand Total
	Home	Hospital	Unknown	
0 Day	1	9		10
1 Day	1	18	5	24
2 Days	4	20	1	25
3 Days	2	20	7	29
4 Days	3	16	1	20
5 Days	2	6		8
6 Days	2	5	3	10
7 Days	3	5	1	9
8 Days	2	3	2	7
9 Days	1	9	2	12
10 Days	2	3	1	6
11 Days	1			1
12 Days			1	1
13 Days		1		1
14 Days		1		1
16 Days	1			1
18 Days	2			2
20 Days	1			1
21 Days		1		1
27 Days			1	1
34 Days	1			1
Grand Total	29	117	25	171

7 September 2021

I would also like to obtain figures for the number of renal transplants living and deceased over the past five years and the number of kidneys unsuitable for use

The number of transplants are set out in the table below:

	Living	Deceased
2016 (July)	38	28
2017	73	58
2018	59	57
2019	64	49
2020	29	129
2021 (July)	21	31
TOTAL	284	352

There were nine kidneys unsuitable for use due to damage to the kidney when inspected, pre-transplant.
