

**28 March 2022**

## **Operating Theatres at Musgrave Park Hospital**

**Please can you tell me how many operating theatres, out of the 9 or 10 available, are currently in use on a daily basis in Musgrave Park Hospital?**

As of 24 March 2022: -

4 out of 10 theatres at Musgrave Park Hospital are being utilised for surgery at present. This represents 38 theatre sessions per week with a combination of core and additional activity for trauma and orthopaedic surgeries.

From 4 April 2022, we plan to increase activity with 5 out of the 10 theatres operational with a total of 44 theatre sessions per week, again with a combination of core and additional activity for trauma and orthopaedic surgeries (34 elective lists + 10 fracture lists).

This equates to Musgrave Park Hospital operating at approx. 60% of its pre-pandemic theatre capacity.

This anticipated increase will enable Musgrave Park Hospital to operate at approximately 47% of its pre-pandemic elective capacity.
