

**19 April 2023**

## **Blood Products – Remaining Information**

I want to submit an FOI request for the amount of consumption of blood products (**Fresh whole blood (FWB), Fresh Frozen Plasma (FFB), Cryoprecipitate, Factor XIII, red blood cells (RBCs), platelets, etc.**) in their respective unit and the number of patients (or orders) in 2022 (the entire calendar year).

- Broken down by the dispensing institution (blood bank, pharmacy, others),
- By service ordering the products (General Surgery, Hepatology, ObGyn, etc.)
- If available, the procedure (elective, non-elective surgery, retail,)

**We will need more time to get detail pertaining to the service ordering the product or procedure it is used for.**

### **Remaining Response now available**

Please see attached excel spreadsheet

The first tab of the spreadsheet addresses the question re: the number of blood products ordered by ward placing the order.

The second addresses the question re the number of patient orders by type of blood products (Fresh whole blood (FWB), Fresh Frozen Plasma (FFB), Cryoprecipitate, Factor XIII, red blood cells (RBCs), platelets, etc.).
