Contact of who would oversee the assaults of staff over the Belfast Hospitals

I need to contact someone in the Trust who would oversee the assaults on staff over the Belfast hospitals whether that be a manager or risk manager.

I would need a name and email address.

Whilst data relating to incidents is collated and reported centrally, there is no one manager overseeing assaults in the Belfast Trust, such incidents would be managed by the service management team where the assault occurred.

The Trust would require further clarity on what information you require in order to provide the appropriate contact details to assist you further.
