TVTO/TVT PROCEDURES

Can you please let us know, between 2007 and 2010, how many of the following procedures were undertaken by your Trust?

- i. Tension Free Vaginal Tape (“TVT”) procedures;
- ii. Transvaginal Tension Free Vaginal Tape-Obturator (“TVT-O”) procedures;
- iii. Colposuspension procedures;
- iv. Autologous Fascial Sling procedures; and
- v. Urethral Bulking Agent procedures.

	TVT	TVT (Secondary procedures)	TVT-O	TVT-O (Secondary)	Colposuspension	Autologous Fascial Sling	Urethral Bulking Injection
Y2007	33	9	86	18	0	0	30
Y2008	29	8	83	31	<5	0	20
Y2009	43	8	58	23	0	0	33
Y2010	72	35	50	14	0	0	41
Grand Total	177	60	277	86	<5	0	124

Please note that classifications for coding procedural information can change over time and this can lead to errors in recording, if implementation is not totally compliant. Implementation can be difficult for a number of reasons including resource, which at that time was less developed than at present. Additionally, any errors found in audits etc. for this period can be corrected in subsequent periods based on improved patient source documents.

Use of <5 (less than five): We are unable to provide an exact figure - exempt from release under Section 40(2) of the Freedom of Information Act as this could make patients personally identifiable. Disclosure would constitute a breach of the principles of the General Data Protection Regulation 2018.
