DATA PROTECTION IMPACT ASSESSMENT FOR THE NIECR

Under the Freedom of Information Act, I am seeking access to the DPIA conducted for the Northern Ireland Electronic Care Record and / or the Electronic Health Care Record system in operation at your hospital.

When the Northern Ireland Electronic Care Record (NIECR) was implemented in 2013, there was no requirement for a DPIA to be completed. This would have been mandatory for new systems when the General Data Protection Regulation (GDPR) legislation came out in 2018.

If you require further information concerning this, please contact the Business Services Organisation (see link below).
