Number of Gynaecologists in Northern Ireland

I would like to see the number of gynaecologists in Northern Ireland broken down by gender for the latest and earliest periods available.

BHSCT can only provide details regarding the number of staff in the Trust's employ not in NI. With regard to timeframe we can only give information on current employees. We would not be providing information down to gender detail as this is deemed to be sensitive personal information.

There are currently 21 medical staff who delivery gynaecology services in Belfast Trust.

Not all work full time in this specialty, some also provide care in Maternity and Fertility Services.

There is 1 vacant post at Consultant level currently.
